1. FORWARD

NOTE: These statistics have been compiled by David Mislan in his capacity as Soo Greyhound statistician. They have been collected since the 1975/76 season and are based on OHL game sheets. Statistics may not always agree with official OHL records for various reasons, but are very close and are the most accurate records available.

Statistics for 1972/73 through 1974/75 are based on Sault Star season summaries and are lacking in detail and accuracy. They are included in team records as no other source is available. As well, for an unknown reason, the 1990/91 Goaltending statistics are missing several fields. I am trying to find the missing data.

Scoring statistics for individual players include only statistics for games played as a member of the Soo Greyhounds. This affects players obtained during the season via trades.

Also, please note, the 2019/20 season was suspended on March 12/20 due to the COVID-19 Pandemic. The remaining regular season games and playoffs were subsequently cancelled. The Greyhound had played 64 games and statistics and records for those games are considered official. They did not qualify for the playoffs based on their record after 61 games.
